PROFESSIONAL SUMMARY

An ambitious Computer Science student at EELU and Data Science trainee at DEPI. Skilled in C++, Python, and SQL with a strong foundation in Machine Learning and System Programming. Passionate about building efficient back-end systems and extracting insights from data.

EDUCATION

Bachelor of Computer Science

Expected Sept 2027

Egyptian E-Learning University (EELU)

Grade: Very Good

EXPERIENCE

Data Science Trainee

Dec 2025 – July 2026

Digital Egypt Pioneers Initiative (DEPI)

- Responsible for data cleaning, Exploratory Data Analysis (EDA), and predictive modeling using Python and SQL.

TECHNICAL SKILLS

Programming: C++, Python, SQL

Specializations: Machine Learning, OOP, Socket Programming, Multi-threading, Database Design (ERD)

Languages: Arabic (Native), English (B2)

KEY PROJECTS

Multi-threaded Chat Application (C++)

- Developed a real-time communication app using Socket Programming and multi-threading to handle multiple clients simultaneously.

Netflix Data Analysis & ML

- Executed a full data pipeline (Cleaning, Visualization) and built an ML model with 88% accuracy.

Library Management System

- Built a Python system using OOP concepts to manage complex library logic, users, and borrowing systems.

University Database Design

- Designed and implemented a relational database with normalized schema and optimized SQL queries.

SOFT SKILLS

Personal:

Logical Thinking, Problem Solving, Quick Learning
