About Me

I am a 3rd-year Computer Science student at EELU and a Data Science trainee at DEPI. I have a solid foundation in Python and Java, with a specialized focus on Data Science and Machine Learning. I am known for my patience and calm approach when dealing with complex data, which helps me in meticulous cleaning and deep analysis to reach the best results.

Why Me?

“ A patient and detail-oriented Data Professional who excels at cleaning and analyzing diverse datasets with a strong programming background in Python and Java.

Technical Skills

 Programming

- Python (Advanced OOP)
- Java

 Data Science

- Machine Learning
- Data Cleaning
- Matplotlib
- Seaborn

 Databases

- SQL
- Database Design (ERD)
- Data Modeling

 Soft Skills

- Patience
- Calmness under pressure
- Problem Solving
- Logical Thinking

Services

Data Cleaning & Preprocessing

EDA & Insights Generation

Machine Learning Models

Database Schema Design

Featured Projects

Netfli Trend Prediction

[View Code](#)

Python

Pandas

Scikit-learn

Analyzed Netflix dataset to identify trends and built a prediction model using Machine Learning techniques.

✔ **Outcome:** Achieved an impressive 88% accuracy in trend prediction.

Library Management System

[View Code](#)

Python

Advanced OOP

A robust system for managing books and users using Object-Oriented Programming principles, ensuring clean and maintainable code.

✔ **Outcome:** Developed a scalable and well-structured application.

[SQL](#)[ERD Tools](#)

Designed a comprehensive database schema for academic data management, handling complex relationships between students and courses.

Outcome: Created an optimized structure for handling complex student and course data.

Education & Certifications

Faculty of Computers and Information

Egyptian E-Learning University (EELU) | Current Student (3rd Year)

Data Science Trainee

DEPI (Digital Egypt Pioneers Initiative) | Specialized Professional Training
