SUMMARY

Third-year Computer Science student at EELU. Driven by methodical precision and analytical depth, transforming raw, complex datasets into actionable intelligence through statistical learning and data engineering.

SKILLS

Technical skills: Python (Pandas, Scikit-learn, Selenium) | SQL | Power BI | Tableau | Machine Learning | Statistical Analysis

soft skills: Logical Thinking | Problem Solving | Quick Learning

LANGUAGES

Arabic: Native

English: B1

CERTIFICATIONS

Google Data Analytics Professional Certificate (9 Courses) and ITI Python Programming Basics

EXPERIENCE

Machine Learning & Data Science Trainee, *Digital Egypt Pioneers Initiative (DEPI)*
Cairo, Egypt

- Advanced training in ML methodologies, data engineering pipelines, and visualization techniques.

Machine Learning Intern, *Codveda Technologies*
Remote

- Applied supervised learning techniques to real-world datasets and contributed to model validation workflows.

EDUCATION

Egyptian E-Learning University (EELU), *B.Sc. in Computer Science*
09/2023 – 2026 | Al Shohada-Minofya

- Core coursework: Signal Processing, Embedded Systems, and Computational Methods.

TECHNICAL PROJECTS

Flood Risk Dashboard, *Geospatial Analysis*

- Engineered a multi-layered heatmap integrating elevation data with historical patterns for risk assessment.

ML Analyzer Studio, *Model Evaluation*

- Developed a comprehensive tool implementing cross-validation protocols to meticulously assess algorithmic performance.

Web Scraping Pipeline, *Automation*

- Automated high-efficiency data extraction from e-commerce platforms into structured reporting formats using Python.
